

BORDERLINE

Media Kit

Band History

Borderline perform a variety of music including country, rock & roll, blues and the odd Metallica song and if they don't know a song they tend to pull it out of nowhere anyway! They have an extensive play list and have played for 8 hours or more without repeating a song. Mike, Rusty, Doug and Jimbo have been playing together since 1986 back when the band was called The Bandits, along with the greatly missed Stan Parrish. Sharon joined the band a few years ago, and brings with her powerhouse kick ass blow you face off vocals that can sing anything from Patsy Cline to Black Sabbath (no really...you gotta hear this) and a complete lack of shyness, so watch out!!! More than anything the band love to play and if they're having fun, the audience is having fun! So come along and check them out for yourselves and enjoy the talents of Borderline.
